

CASE STUDY

Unified Device Management Improves Operational Efficiency For Golden Harvest Foods

Modern IT systems support food production and distribution growth.

- Client:** Golden Harvest Foods
- Industry:** Food manufacturing and distribution
- Location:** Santa Rosa, California
- Services:** Production and distribution of food products for commercial partners

GroupOne’s Approach

GroupOne IT focused on simplifying device management while aligning the solution with Golden Harvest Foods’ operational needs.

Key Actions:

- Implemented Microsoft Intune to centralize device management
- Unified management across Mac and Windows desktops
- Streamlined IT operations to reduce manual oversight
- Improved consistency in device configuration and management

Results:

- Streamlined IT operations across the organization
- Improved efficiency in device and system management
- Stronger control supported a better user experience
- A modern IT foundation positioned Golden Harvest Foods for continued growth

Executive Summary

[Golden Harvest Foods](#) needed a modern approach to managing devices across a mixed technology environment. As operations expanded, the company sought a way to unify device management, reduce complexity, and strengthen control across Mac and Windows systems. GroupOne IT supported this effort by implementing Microsoft Intune to modernize IT operations and improve day-to-day efficiency.

Challenges

- Managed both Mac and Windows devices without a unified system
- Needed stronger control over devices as operations scaled
- Sought to modernize IT without disrupting daily workflows
- Wanted to improve efficiency across device management and support

Solutions

- Centralized device management through a single platform
- Simplified IT administration across operating systems
- More efficient support processes for internal teams
