

CASE STUDY

# Proactive IT Guidance Supports an Engineering Firm’s Growth

Strategic technology planning and cybersecurity readiness drive client confidence.

**Client:** RSC Engineering

**Industry:** Engineering

**Location:** Sacramento, California

**Services:** Engineering design, analysis, and project support for commercial and infrastructure clients

## GroupOne’s Approach

GroupOne IT focused on staying ahead of technology changes while aligning recommendations with the realities of engineering work.

**Key Actions:**

- Provided early guidance on upcoming technology changes
- Responded immediately to cybersecurity requirements tied to insurance and client contracts
- Implemented controls quickly to meet compliance timelines
- Applied industry knowledge specific to engineering firms

## Executive Summary

[RSC Engineering](#) needed an IT partner that could anticipate technology shifts and respond quickly to client-driven requirements. GroupOne IT delivered forward-looking guidance, fast cybersecurity implementation, and industry-aware support that helped RC Engineering win new business and stay ahead of change.

## Challenges

- Needed proactive guidance on emerging technologies
- Required fast action when clients imposed new cybersecurity requirements
- Sought an IT partner that understood engineering workflows and compliance needs
- Wanted technology decisions to support business growth and client trust

## Solutions

- Proactive technology planning that reduced last-minute disruptions
- Rapid cybersecurity implementation to meet client and insurance expectations
- Ongoing advisory support tailored to engineering operations

*“GroupOne truly understands the challenges we face as an engineering firm. We’ve partnered with them for over 14 years, and they’ve consistently kept us ahead of emerging technologies, advising us well in advance on the changes we need to make. When a client required cybersecurity as part of our insurance coverage, GroupOne immediately knew exactly what to do and implemented it quickly. That capability has had a major impact on our business and helped us secure new clients. I would highly recommend GroupOne, especially to engineering firms because they genuinely understand our needs and deliver exceptional service.”*

Jay Singh,  
President in RC Engineering

**Results:**

- RC Engineering met cybersecurity requirements without delays
- Faster compliance helped secure new client engagements
- Leadership gained confidence that technology decisions supported long-term growth
- GroupOne IT became a trusted advisor with a deep understanding of engineering needs

**Need an IT partner that understands  
how technology impacts you?**

GroupOne IT delivers proactive guidance and fast execution.
